Todos os lava-louças da Sanindusa são produzidos em ***fine fire-clay***, numa mistura de matérias-primas 100% naturais com propriedades antibacterianas. São revestidos com uma camada de vidro com cerca de 2mm de espessura e sujeitos a elevadas temperaturas em forno de 1220°C, o que lhes confere um ***elevado grau de resistência aos riscos e ao desgaste*** e garante-lhes uma vida útil duradoura, mesmo em situações de uso intensivo.

All Sanindusa kitchen sinks are produced in ***fine fire-clay***, in a blend of 100% natural raw materials with antibacterial properties. They are coated with a 2mm glaze layer and exposed to a high temperature oven (1220°C), making them ***resistant to scratches and wear***. These products have a high durability and life span, even in situations of intensive use.

Tous les éviers Sanindusa sont produits en ***fire-clay***, dans un mélange de matières premières 100% naturelles aux propriétés antibactériennes. Ces pièces sont revêtues d'une couche de verre d'environ 2mm d'épaisseur et sont soumises à un four à haute température (1220°C), ce qui leur confèrent un ***haut degré de résistance aux rayures et à l'usure***, en leur fournissant une longue durée de vie, même dans des situations d'utilisation intensive.

Vantagens

Advantages | Avantages

⚙ *Resistente a ácidos*

Acid resistant | Résistant aux acides

⚙ *Resistente ao calor*

Heat resistant | Résistant à la chaleur

⚙ *Resistente a choques*

Impact resistant | Résistance aux chocs dans les tâches domestiques

⚙ *Resistente a riscos e manchas*

Scratch and stain resistant | Résistant aux rayures et aux taches

⚙ *Higiénico e seguro para preparação de alimentos*

Hygienic and safe for food preparation | Hygiénique et sûr pour la préparation des aliments

⚙ *Estabilidade de cor - também em caso de exposição direta à luz solar*

Colour stability - even in direct sunlight exposure | Stabilité des couleurs - également en cas d'exposition directe au soleil
